# WELCOME!

## ABOUT THE PROGRAM

The Get Fit Where You Sit program is designed for working professionals to exercise where they spend the majority of their time—at their office!

No matter what constitutes a person's "office" (private office, cubicle or other corporate setting, home, etc.), the important thing about this program is that no special equipment is required. All exercises are designed to use things at your fingertips—an office chair (without wheels), desk, wall, water bottle, laptop or other items that can serve to add weight (if necessary). Ultimately, a chair and a water bottle will suffice for most exercises. In addition, these exercises can be performed in most any attire.

### THREE LEVELS:

**BEGINNER**

**INTERMEDIATE**

**ADVANCED**

### TWO EXERCISE SERIES:

**SERIES 1**  
**WEEKS 1-3**

**SERIES 2**  
**WEEKS 4-6**

### FULL INSTRUCTIONS:

Number of reps and sets are indicated for each exercise and exercises are outlined for each day.

# DID YOU KNOW...

## NEED A LITTLE BOOST OR REASON TO GET MOVING?

### CONSIDER THIS:

- ▶ People who sit still more than four hours per day have a 40% higher risk of developing a preventable disease than those who are active.
- ▶ Physically active men lower their risk of stroke by 66% and physically active women decreased their risk of stroke by 50% with just three days of physical activity per week.
- ▶ People who don't perform regular physical activity are more likely to become depressed. Activity reduces mood swings and helps a person maintain a sense of emotional well-being.
- ▶ People who are sedentary have the highest rate of heart attack.
- ▶ Bones and muscles require regular exercise to maintain their mineral content and strength. Bone loss progresses much faster in people who are physically inactive.
- ▶ Sedentary lifestyle can lead to:
  - Anxiety
  - Deep Vein Thrombosis
  - Depression
  - Diabetes
  - Colon Cancer
  - High Blood Pressure
  - Obesity
  - Osteoporosis
  - Lipid Disorders
  - Kidney Stones
  - Carpal Syndromes
  - Back and Neck Pain
  - Spinal Disc Herniation (low back pain)

# THE GOOD NEWS

## PHYSICAL ACTIVITY FOR AT LEAST 10 MINUTES PER DAY:

- ▶ Helps maintain bone and muscle density.
- ▶ Improves sleep and overall stress level.
- ▶ Prevents weight gain and promotes weight loss.
- ▶ Helps prevent Type II Diabetes.
- ▶ Improves your chances of living longer.
- ▶ Helps prevent cardiovascular disease and lipid disorders.

# GETTING STARTED

## STEP 1: DETERMINE YOUR FITNESS LEVEL

The first step to starting the Get Fit Where You Sit program is deciding which level is best for you. There are three levels: Beginner, Intermediate and Advanced. Each section is color-coded to make it easy for you to flip through to the appropriate section.

Use the following guidelines to help you choose where to start:

### BEGINNER

New to working out or currently exercising 1–2 days a week at low to moderate intensity? The Beginner series is where you will want to start (page 10). All Beginner workouts are color-coded green.

### INTERMEDIATE

If you're working out 2–3 days a week at a moderate intensity, choose the Intermediate series (page 30). The Intermediate series is color-coded blue.

### ADVANCED

For those working out more than 3 days a week at a vigorous intensity and your routine already includes a combination of weight training and cardio activity, the Advanced series is for you (page 56). The Advanced series is color-coded yellow.

## STEP 2: CHART YOUR COURSE

Once you've determined the series most appropriate for you—Beginner, Intermediate or Advanced—you'll see that each series is divided into two sections: Weeks 1–3 and Weeks 4–6.

Within the series, we've outlined a week's worth of exercises for each section: Weeks 1–3 should be repeated for 3 weeks, then Weeks 4–6 repeated for 3 weeks.

Depending on which Series you are working in, you'll exercise 4–6 days each week. Exercises are shown for each day.

### FOR EXAMPLE

If you are starting in the Beginner Series, your first set of exercises for weeks 1–3 begin on page 12 as follows:

- ▶ **DAY 1** = STRENGTH: LOWER, pages 12–13
- ▶ **DAY 2** = CARDIO + ABS, pages 14–15
- ▶ **DAY 3** = STRENGTH: UPPER, pages 16–17
- ▶ **DAY 4** = CARDIO + ABS, pages 18–19

You will complete week 1, then repeat the same exercises for weeks 2 and 3. After completing week 3, move to the next section: weeks 4–6. A week's worth of exercises are then outlined per day (pages 22–29) and should be repeated for 3 weeks.

### THE BEST PART ABOUT THE PROGRAM IS ITS FLEXIBILITY!

Once you complete a 6-week series—Beginner, Intermediate or Advanced—you can:

- ▶ **MOVE ON TO THE NEXT SERIES** —OR—
- ▶ **REPEAT THE SERIES YOU JUST COMPLETED, THIS TIME ADDING MORE REPS, SETS OR WEIGHT**

If you find the exercises too easy, increase the intensity (we tell you how to do this at the beginning of each section) or move to the next series. If you're not ready to move to the next series, you can always repeat a series until you are.

# RESOURCES

You've chosen your level and are ready to get started. We've made it easy for you to navigate the program by giving you a variety of resources for support. You'll know what workout to do, what day to do it, how to do each exercise and how many sets, reps and/or length of time each should be performed. Here's what we've provided:

## ► GUIDEBOOK

This guidebook is meant to do just that—guide you through each workout. Workouts are organized by level, week and day. We created visual references for every exercise and included your sets and reps for each. To the side, we added quick notes and reminders with tips for keeping good form, how to modify intensity (make it easier or make it harder) and more. Use the workout pages as a visual aid to guide you through your weeks. (Workouts for each series begin on the following pages: Beginner Series: page 10; Intermediate: page 30; Advanced: page 56).

## ► ONLINE VIDEO LIBRARY

In addition to the guidebook of exercises, we've also created an online video library. Here you'll find video demos of each exercise in action showing you proper form from start to finish. Like the Guidebook, the library is organized by the three levels — Beginner, Intermediate, Advanced — and by workout. This will allow you to find all the exercises for every workout in the order they should be performed, with the recommended reps listed. [www.GetFitSitWings.com](http://www.GetFitSitWings.com)

## ► PERSONAL COACH

While we can't be there with you for every workout, we are just an email or phone call away. Anytime you have questions, need a boost of motivation or otherwise, you have a personal coach on your side.

# THE WORKOUTS

## IT'S TIME TO DIVE IN!

The workouts are color-coded by level and organized by day. You can also see each of these exercises in action online at:

[www.GetFitSitWings.com](http://www.GetFitSitWings.com)

### REMEMBER:

- Go at your own pace as you get used to performing each exercise.
- If you have an injury, don't perform exercises that cause pain or put additional stress on the injured area. Contact your personal coach (if available) or a fitness professional for a modification.
- If you can't do the full range of motion for an exercise, do what you can. As long as you are making the effort, keeping correct form and staying consistent, you'll get there. Consult with your personal coach if you have concerns.

## WELCOME TO THE INTERMEDIATE SERIES, WEEKS 1–3.

A few things to keep in mind before beginning the workout routines:

Some of the exercises will use a chair. Make sure the chair you are using does not have wheels. If it does, lean it against a wall or stable surface so it does not slide. If a sturdy chair is not available, we recommend that you use a sturdy desk, table or bench. For demo purposes, we will be using a chair.

Don't forget to hydrate with water every 10–15 minutes during the workouts, especially on cardio days!

Remember to reference our website at [www.GetFitSitWings.com](http://www.GetFitSitWings.com) for demonstration videos of any of these exercises.

## INTERMEDIATE WORKOUT, WEEKS 4–6

Kudos to you for completing the first three weeks of the Intermediate Workout. As you progress, you'll see that we've added weights for some of the exercises.

For demonstration purposes, we used water bottles as they're easy to hold, something you most likely have on hand (because we know you're staying hydrated!) and can be accessed at the office, when traveling and in most places where you're likely to exercise.

Keep in mind you can use anything you have on hand to add weight—a stapler, tape dispenser, book...whatever you have at your fingertips. Just make sure you can easily hold onto the object.
